

Pond Vacuums

Pond vacuums remove sludge and debris quickly and efficiently from ponds and fountains. Both the PV-1 and PV-2 can be used as a wet or dry vacuum, making clean-up around your pond or fountain simple and easy.

The PV-2 is a professional-grade vacuum with 15% increased suction and 45% larger holding capacity over the standard unit. The PV-2 also has heavy-duty aluminum extension tubes, wheels and a handle, which make this a great tool for the pond professional.

PV - 1

PV - 2

	PV - 1	PV - 2
